THE WORLD OF INTERIORS

FLYING COLOURS

As anyone with the decorating bug knows, if a scheme is to take off you need a palette that's a mite special. Well, no flies on us! Paint shades of a whole new order are just our domain, whether it's cochineal, leaf green or mushroom. Marshalling myriad specimens, Maude Smith has neatly – nay, taxonomically – classified all the options. Total genus! Photography: Anders Gramer
