

FRANCESCA'S PAINTS LTD

List of Ingredients in Francesca's Limewash:

Francesca's Limewash is a traditional paint finish, pre-mixed in all our colours.

Limewash is the earliest known form of paint. It is part of our past, stretching back to ancient Egypt and Greece.

Derived from limestone and made from slaked lime, it is the oldest and most natural paint form. Unlike plastic paints, limewash is a breathable paint for walls, preventing mould growth and allowing the passage of moisture vapour through walls.

Francesca's Limewash stands out for its beautiful finish: soft, matte, velvety with a unique, mottled and slightly textured effect, adding character and depth to your walls. It absorbs the light and changes its appearance throughout the day, creating a unique softness. Limewash is especially well-suited for historical buildings.

Contents:

- Resin in aqueous emulsion
- Purified water
- Noble Pigment – Titanium Dioxide
- Lime putty – of Natural Origin
- Semi Amorphous Calcium Carbonate of Natural Origin
- Antifoam with Eco Profile
- Wetting additive with Eco Profile
- pH stabilizer – of non-natural origin
- Thickener – Cellulose Ether
- Coalescent of Non-Natural Origin to optimize film formation
- Ethylene Glycol – Non-Natural additive for brushability

NOTE: Ingredients of non-natural origin do not exceed 11% of the recipe and they are with Low Environmental Impact
